GEOSPACES

Transformation through AI, Revolutionize your business ROI

Geospaces is created to help companies embrace AI quickly and successfully. Our primary goal is to partner with the clients to accelerate AI adoption through integrating world class solutions. As partners, together we can identify concrete strategies and solutions, and hypothesize a solution to address key ROIs. Utilizing our acceleration platform, components to expedite the process allows customers to see actionable results quickly, and combined with our unique collection of cutting-edge tools, access to the latest research and our active AI community we are driving successful AI adoption for customers around the globe.

Geospaces also offers customers **multiple ways to engage**, making it easy to get started. Whether collaborating on smaller solution-based projects or partnering to inject AI DNA throughout the enterprise. We are committed to accelerating AI results and offering real customer value.

Geospaces

Geospaces Solutions

Learn the system dynamics using world class time series analytic framework. Develop intuition on the data and signals. Eliminate noise and identify the signals – a perfect traffic management suite.
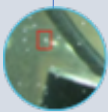

Current SOLUTIONS

Market Dynamics: Easily understand the system dynamics through our unique time series analysis framework – Maximize efficiency and leverage data insights. Potential Users are forecasting and outlier detection.

Knowledge Management: Aggregate and index your unstructured and structured data – turn your data into information. You will never lose the organization wisdom and continue to grow nontangible assets.

Speech video analytics: speech in audio data is crucial for organizations to optimize business operations. Through advanced data collection techniques collect data from wide variety of sources and transcribe and translate as relevant to your business

Congruent framework development: Utilize the framework for online presence. Online customer management, experiment and learn from user analytics and behavior.

Geospaces Transformation

By partnering with data savvy organizations our teams work closely with internal teams and executive leadership teams, identify, and execute core projects. While internal teams are empowered with sustainable expertise, this ultimately provide sustainable strategic internal expertise for long-term value driven results.

Execute Pilot Projects to gain momentum: partner, select and execute on an AI project to help your organization to gain momentum
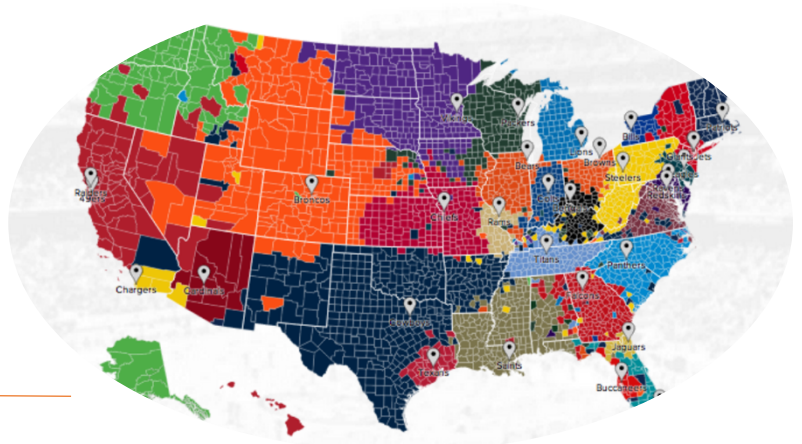

Build an internal AI team: Geospaces to work with you to build a string in-house project. Leverage our network of top AI talents around the globe. Geospaces will be your extended family.

Provide AI training Provide various levels of presentation (a) Executive training (b) practitioners (c) operations and marketing team.

Develop AI strategy for your organization. We help to position your company to become a leading AI company in its sector.

Communication of your organizational vision to internal and external ecosystem.

Know your customers and location through advanced geo-spatial analysis, target messaging and relevance

Expediate AI Platform

Accelerate **Business Metrics**

1 Optimize your Business Operations

Learn through data, strategically acquire new data

2 Augment your Product Offering

Market and target your audience – master timing, behavior & content
Geospatial solutions

3 Deploy new Product Lineup

Increase business valuation – create new roadmaps

Geospaces partnership is purpose built for your organizations to inject AI to expediate adoption through

- Rapid Experimentation
- Speed of Innovation
- Empowering Customers

Empower your
customers

Geospaces empower companies to jumpstart AI adoption and quickly realize practical value. By strategically collaborating with in-house teams to understand their needs, and providing access to the AI acceleration platform, we create an AI implementation that will expedite results.

Whether partnering with enterprise teams to implement a longer-term, sustainable effort to inject AI into the organization's DNA through the transformation model or providing a deployment-ready knowledge management solution from the AI Solution Suite, we are committed to helping companies worldwide understand the real value of AI.
